

UNION STUDIO
ARCHITECTURE & COMMUNITY DESIGN

Creating opportunities for children to
connect & grow beyond limitations

From home to community. A design collaboration creating spaces for special needs children to thrive.

Our **MISSION**

is to deliver quality of life to individuals living with disabilities and serious conditions and to their families through universal access, freedom and mobility in their homes and neighborhoods.

Our **GOAL**

is to eliminate barriers for individuals facing physical challenges in their living environments and providing home access and quality of life improvement solutions for all budgets.

Our **VISION**

is to create spaces for individuals and communities where people with and without disabilities live an inclusive and interactive life without facing physical boundaries and universal access is a matter of course.

By incorporating universal design into our work “Bringing people together” will now truly mean
UNITING PEOPLE OF ALL ABILITIES.
